

AMENDMENTS TO THE CLAIMS

1. (Previously presented) Encapsulated blister package, **characterised** in that it has a flat outer casing (1) open at least from one side, and an inner part (2) bound to the outer casing and being at least partly extractable, the inner part comprising a disc (7) formed as a blister package fitted rotatably onto a base (5), which has an outlet opening (9) below the disc so that products (8) brought to the opening by rotating the disc can be released from the disc by pressing the respective blister (15) and removed from the package through the opening.
2. (Original) Package according to claim 1, **characterised** in that the casing (1) and/or the inner part (2) is provided with a retainer (11, 12), preventing the inner part from becoming loose from the casing.
3. (Original) Package according to claim 1 or 2, **characterised** in that the disc (7) consists of a blister sheet (13) of flexible plastics, and a bottom (14) made of flexible material, such as foil paper, which breaks when the product (8) is released by pressing.
4. (Currently amended) Package according to ~~one of the preceding claims~~ claim 1, **characterised** in that the disc (7) contains individual products (8) arranged to form an arc of a circle or a ring so that they can be brought to the outlet opening (9) or like in the base (5) one at a time by rotating the disc.
5. (Previously presented) Package according to claim 4, **characterised** in that the products (8) are arranged as several concentric arcs or rings in the disc (7).

6. (Currently amended) Package according to ~~one of the claims 1—3~~ claim 1, **characterised** in that the products (8) are arranged as a spiral in the disc (7).
7. (Currently amended) Package according to ~~one of the preceding claims~~ claim 1, **characterised** in that the base (5) is provided with a longitudinal outlet opening (9), extending in the direction of the radius of the disc (7).
8. (Currently amended) Package according to ~~one of the preceding claims~~ claim 1, **characterised** in that the disc (7) and/or the base (5) contains a hindrance, which allows the disc to rotate to one direction only.
9. (Currently amended) Package according to ~~one of the preceding claims~~ claim 1, **characterised** in that the disc (7) comprises a sector (19), which is free of the packed products (8), and that in an unopened package, said sector is located at the outlet opening (9) in the base (5).
10. (Currently amended) Package according to ~~one of the preceding claims~~ claim 1, **characterised** in that the disc (7) is articulated onto the base (5) from its middle section (6).
11. (Currently amended) Package according to ~~one of the claims 1—9~~ claim 1, **characterised** in that the extractable inner part (2) comprises a base (5) and a projection (20) extending from its side (10) above the disc (7) for keeping the disc in place on the base.
12. (Original) Package according to claim 11, **characterised** in that the disc (7) rests freely on the base (5) so that it can be rotated by fingers.

13. (Currently amended) Package according to claim 11 ~~or 12~~, **characterised** in that the projection is formed as an annular rim (20) encircling the circumference of the disc (7).

14. (Previously presented) Package according to claim 12, **characterised** in that the rim (20) has a tongue (24), extending towards the centre of the disc (7), at which a blister (15) in the disc (7) is left under the rim.

15. (Currently amended) Package according to ~~claims 8 and 14~~ claim 8, **characterised** in that the rim (20) has beside the tongue (24) at least one fin (25) directed down towards the disc (7), turning to one direction only so that, in cooperation with a blister (15), it allows the disc to rotate to one direction only.

16. (Currently amended) Package according to ~~one of the preceding claims~~ claim 1, **characterised** in that the outer casing (1) and the base (5) of the inner part are made of packaging board.

17. (Currently amended) Package according to ~~one of the preceding claims~~ claim 1, **characterised** in that the package is a medicine package containing tablets (8), capsules or pills.
